

HSL-Streetscape

Stride Treglown were appointed by the University of west of England to design the latest phase of the 25 year master-plan. The £50m project to build a new building to house the Bristol Business School and Bristol Law School. Located in the heart of Frenchay Campus, the new Faculty of Business and Law building will provide an inspiring new business and learning environment, reinforcing the practice-based approach and real-world connections UWE are well known for as a university.

The heartzone amenity space was ready ahead of schedule, reinstating the link between the new Students' Union and the rest of the campus. The final paving will took place in summer 2016, with overall completion in November 2016, with the building opening planned for early 2017

Hardscaping Solutions Ltd worked with Tercon Civil Engineering and Groundworks contractors based in Bristol, to make sure the benches and seats were manufactured and delivered within the required programme window. The high quality of the finished products, colour and surface finish reflect the modern building design, and help to provide an external environment in keeping with the building and campus quality, and providing areas for the students to meet and relax between lectures.

The overall project was completed on time within the tight programme, with a high quality end result. The finished look mirroring the appeal of the UWE campus. The overall quality of the external space, will be appreciated for years to come by students and visitors alike to the UWE Bristol site.

UWE Bristol

New Faculty - Business & Law

Client	University West of England
Landscape	Stride Treglown
Contractor	Tercon
Product	Urbastyle Woodline range

Hardscaping Solutions Limited worked closely with Stride Treglown in Bristol to ensure the Urbastyle product specification was correct, and that the finishes and colours followed on from the Urbastyle Woodline benches supplied on an earlier phase of the university campus
