

Hardscaping Solutions Ltd

Celtic Manor Hotel—New access bridges

Contractor	Alun Griffiths (Contractors) Ltd
Client	Celtic Manor Hotel, Newport, South Wales
Supplier	HSL
Material	Precast concrete bollards

Urbastyle bollard round 45cm dia

With the construction of the new access bridge, the Hotel required precast bollards that would not only provide vehicle restraint, but also reflect the high quality of finishes and appearance of the hotel itself.

Hardscaping Solutions were approached by the site management for Alun Griffiths contractors, initial colour swatches were provided followed by a full size sample to show the colour and surface finish, also a M20 insert was cast into the base rather than our standard M12 for improved safety/security, they were manufactured in our Buff concrete colour ref 812-05 with a micro etched finish

The project was completed with the installation of 80 bollards on time and to the satisfaction of the client. The high quality finish and colour of the Urbastyle product was high of the list of requirements. The client wanted the initial aesthetics of the approach bridges to reflect the high quality standards set by Celtic Manor resort.
